

FREE ENERGY-EFFICIENT APPLIANCES TO LOWER YOUR ELECTRIC BILL

Help lower your energy costs by replacing your current household refrigerator, cooling system, lighting, and more with energy-efficient models through the **Energy Savings Assistance Program**.

Available Appliances and Services

Cooling Systems

If your home has a working air conditioning unit, you may receive one of the following:

- A replacement, energy-efficient, central or room air conditioner, or
- An energy-efficient evaporative cooler (also called a "swamp cooler")

Note: These services may not be available in all areas.

Refrigerator Replacement

An older refrigerator can be more costly to operate. A **free** ENERGY STAR[®]-qualified model can be provided to you to replace a less efficient refrigerator. Plus, we'll also take the old refrigerator away for proper disposal and recycling at no charge.

Note: All replacement refrigerators meet ENERGY STAR[®] standards. We will install white top-freezer models without extra features, such as icemakers. Replacement size depends on the size of the old unit.

Smart Power Strip

TVs, DVRs/home theater systems, computers, printers and game consoles are just a few electronic devices that draw power even when you think they're turned off. We'll provide a **free** smart power strip to reduce your power usage by shutting down power to your devices that go into standby mode.

Pool Pump Replacement

If your home is a single-family dwelling with an in-ground swimming pool, you may be eligible for a **free** replacement pool pump that operates much more efficiently.

The Energy Savings Assistance Program — Easy as 1-2-3

1. Qualification and Assessment

To be eligible, you must meet specific household income guidelines. After qualification, a contractor will do a walk-thru of your home to make an assessment regarding the potential installation of one or more appliances or services.

2. Service Delivery

Installation and services, such as weatherization, are carried out by respected community service agencies and approved contractors.

3. Inspection

An inspection may be conducted to ensure you are satisfied with the updates and to verify the installed appliances and services are working properly.

Weatherization Services

Households with electric space heating may receive weatherization services to help keep your home warm in the winter and cool in the summer.

Note: If your home has natural gas space heating, you should contact your local gas provider for weatherization services.

Lighting

Energy-efficient lighting and light bulbs can help conserve energy and save you money.

- **Light Emitting Diode (LED) bulbs** may be provided as they use less energy than ordinary incandescent bulbs and last longer.
- **Replacement outdoor fixtures with LEDs** may also be provided.
- **Energy-efficient LED torchiere lamps** may be provided to replace working models that use halogen or incandescent bulbs.

.....
Assistance Program[™]

Southern California Edison's (SCE) Energy Savings Assistance Program (ESA)

Are You Eligible for Free Appliances?

The Energy Savings Assistance program is designed to help you conserve energy and save money. Income-qualified customers may be eligible to receive energy-efficient appliances at no charge or a minimal charge.

- In some instances, a copayment may be required.
- If you qualify, we'll cover the costs—including installation—of new energy-efficient appliances.
